

Supporting the animals' natural ability for a healthy start

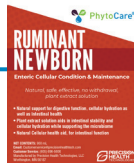

PhytoCare®

LIQUID PRODUCT LINE

PhytoCare® patented veterinary formulated Polyphenolic solutions for ruminant animal enteric and skin health. Developed for the ruminant monogastric developmental phase prior to rumen activation. Polyphenolic solutions supporting the animals' natural ability for a healthy start, lasting productivity and include the PHT's patented APM™ (Activated Phenolic Molecules).

Ruminant Concentrate:
Designed for larger operations with adjustable applications for Enteric Bioamine maintenance, enteric stabilization, and severely stressed enteric animals with diarrhea a dehydration.

Ruminant Newborn:
Formulated as an enteric solution for ruminates as they transition to active rumen function, supports favorable enteric bioamine stimulation for healthy intestinal function as the intestinal track matures.

GI-REVIVE™
The go to product to support enteric health is newborn calves during nutritional changes as well as enteric stress issues. Formulated for the underprivileged animals with high stress dehydration and diarrhea syndromes.

Ruminant Skin Care:
A formulated product for any external skin conditions. Producers have adapted this product to many skin issues from naval care, skin abrasions and sores to udder skin care.
